

Mr. Atanu Sen

Chair - ICC National Expert committee on Banking, Financial Services & Insurance

- To revive and sustain the economic growth, Government needs to initiate structural changes through reforms in land, labour and legal sector.
- There is also a need to boost the overall consumer demand by rationalization of direct taxes. As reviving demand remains the key to reviving private investment.
- Government also need to increase its spending to growth revival. It needs to spend to expand the infrastructure sector so as augment its own demand.
- The Government needs to focus its policy on creating good jobs for the youth and burgeoning workforce, creating an educated and healthy labour force, raising farm productivity while strengthening agricultural resilience and integrating into the value chains.
- The USD 5 trillion economy target can be achieved by addressing the structural issues and enhanced infrastructure spending.
